

CYDECTIN LONG ACTING

FROM THE FARMERS MOUTH

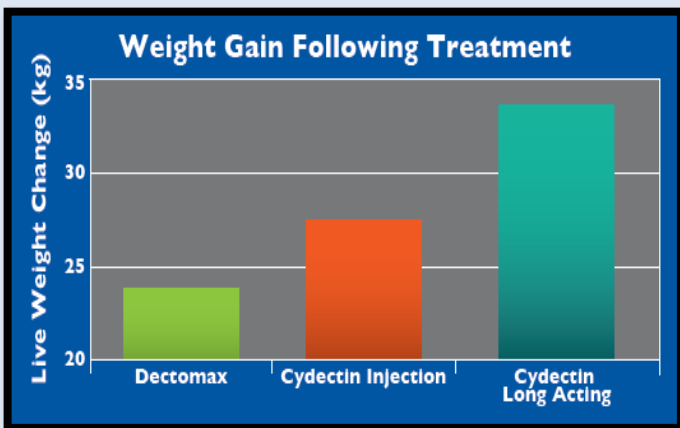

“We started using the LA on the weaners in the trial, and now use it on everything we can – we have seen such great results with increase in production and condition of our cattle, the extra 10kg gain on the weaners is money in the bank.”

- Jim Viner, Gympie, QLD

“LA has saved us our spring weaner muster and one treatment at what has been a drier period of the year whilst at the same time reducing the number of poorer cattle from weaning to grow out.”

- Will Wilson, Calliope Cattle Company, Central QLD

“We have seen a noticeable difference in our weaners treated with Cydectin LA, especially with ticks, even with Brahmans you see a lift in condition and growth with less tick.”

- Bevan Glasgow, Riuna Brahman Stud, South Kolan, QLD

For more information on these products, contact your Area Sales Manager who can be found at www.virbac.com.au or by calling **Customer Support 1800 242 100.**

“Normally, we would have to re-treat for ticks in the summer, but the Cydectin LA kept them clean inside and out for the whole period through to the following year when the next annual treatment was due. The use of the product also ensures better pasture management as our tick population was kept lower for longer.”

- Kate Chapman, Rowanlea Cattle Company, Calliope, QLD

“Cydectin LA is easily incorporated into our program and we find its use gives us the advantage of less mustering for re-treatment, saving time and labour costs while giving the cattle a good start.”

- Carolyn Kenny, Wajatryn Pastoral Company & Droughtmaster Stud, Gayndah, QLD
